

Issues for refugees

These Refugee Guides have been written to help you tackle any issues you might come across when setting up your business. They also show how much support there is to help you along the way. Not only the friends, family or members of your community, who you might turn to for advice or a loan, but also the many government and voluntary agencies set up specifically to help entrepreneurs.

Please note:

 The material has been assessed by Language and Literacy Unit+ (LLU+), London South Bank University and should be accessible to people who are at entry level 3 in their reading of English.
