

Introduction

This toolkit is for mainstream business advisers to help them work with potential refugee entrepreneurs. It forms part of a family of advice materials that aim to help refugees set up in business, including [Refugee Business Advice](#) - a toolkit for advisers in Refugee Community Organisations, and a set of [Self-Help Guides](#) for refugees who want to set up their own business.

This toolkit covers the background to refugee issues, and what you as a business adviser will need to know when helping a refugee set up in business. It also offers advice on working with Refugee Community Organisations.
